

THE ALL-IN-ONE PRIVATE TOOLKIT

Every file tool you need, that stays private.

SafePaper is one place to work with your files — documents, photos, videos, spreadsheets and more. Everything happens on your own device, so your files stay private and are never uploaded.

2026 EDITION

WELCOME

One private place for all your files

Most “free online” tools ask you to upload your file before they can help. SafePaper doesn't. It's a single website that lets you work with your files — and everything you do happens right on your own device, so your files never leave your hands.

It started as a simple PDF tool and grew into an all-in-one toolkit: 250+ tools across 22 areas, from merging PDFs and editing photos to converting videos, tidying spreadsheets and even chatting with an AI — all with no account, no subscription and nothing uploaded. If you can open a file, SafePaper can help with it privately.

The simple promise

Your files stay on your device. SafePaper never uploads them, never stores them, and never asks you to sign in. That's the whole idea.

What's inside this guide

01 Your privacy

The promises we make and why they hold

02 Who it's for

The people and jobs SafePaper is built for

03 All 22 workspaces

A quick tour of everything you can do

04 The full tool list

Five chapters covering all 250+ tools

05 Common questions

Quick answers to what people ask most

06 Getting started

How to try it in seconds

YOUR PRIVACY

Private by design

SafePaper is built around one idea: your files are none of our business. Here's exactly what that means for you.

Your files never leave your device

Documents, photos and data stay on your computer or phone. Nothing is uploaded to us or anyone else.

No account, ever

No sign-up, no email, no login. Just open the site and start using any tool.

Nothing is stored or tracked

We don't keep your files, and there are no trackers following what you do.

Works without internet

After the first visit, most tools keep working even when you're offline.

Completely free

Every tool is free with no limits, no watermarks and no upsells.

Never used to train AI

Because your files aren't sent anywhere, there's nothing for anyone to collect or learn from.

Why we can promise this

Other free tools work by sending your file to their computers to do the job. SafePaper works differently: it does everything inside your web browser — the same place you already opened the file — so your documents, photos and data simply never get sent anywhere. And because nothing is uploaded, anyone tech-savvy can confirm it for themselves (the separate Technical Overview explains how).

WHO IT'S FOR

Made for files you can't upload

When a file is private, it should stay on the device that opened it. SafePaper is made for exactly those moments — and for the everyday jobs that just shouldn't need an account.

Lawyers & compliance

Black out sensitive parts of documents and share confidential files — without any of it going to an outside company.

Doctors & clinics

Open and anonymize medical scans and records while keeping patient information on your own computer.

Finance & HR

Work with pay slips, bank statements and personal details privately, with nothing uploaded.

Developers & IT

Reach for dozens of everyday utilities and manage password vaults without pasting sensitive data into random websites.

Photographers & creators

Edit photos, convert videos and clean up audio — no watermarks, no accounts, no uploads.

Everyone else

Merge a PDF, convert a phone photo or sign a form in seconds — no sign-up required.

AT A GLANCE

Everything you can do

SafePaper is organized into 22 workspaces. The standout tools come first, followed by each workspace and how many tools it includes.

AI Desk

Ask your PDFs

Ask questions about your own PDFs and get answers that point you to the exact page.

SafePaper Assistant

Private AI chat

A private AI chat that runs entirely on your own computer — no account and no sign-in.

Data Room

Secure sharing

Bundle PDFs, videos, images and spreadsheets into a single, password-protected file.

Record Desk

Screen recorder

Record your screen and webcam and get automatic captions and a written transcript.

Share Desk

Direct transfer

Send a file straight from your device to someone else's, without it passing through any cloud storage on the way.

Document Desk

33 tools

Everything you would send to an online PDF tool — create, merge, edit, sign and more.

Scan Desk

9 tools

Scan documents with your camera — auto-crop, clean up and save as a searchable PDF.

Email Desk

4 tools

Open email files, save them as PDF, pull out attachments and check where a message came from.

Resume Desk

4 tools

Build a resume with live preview, check it against job keywords, and write cover letters.

Handwriting Desk

8 tools

Turn typed text into realistic handwriting — as pages, in your own hand, or as a video.

Archive Desk

2 tools

Peek inside ZIP files, pull out a single file, or build your own password-protected archive.

Media Studio

18 tools

Convert, trim and compress video, make GIFs, build collages and clean photo location data.

Photo Desk

5 tools

A full photo editor with filters and one-tap enhance, plus iPhone (HEIC) and camera-RAW conversion.

Vision Studio

9 tools

Smart image tools — remove backgrounds, upscale, auto-blur faces and write image descriptions.

Audio Lab

10 tools

Trim, clean up, convert and automatically transcribe audio.

Diagram Desk

9 tools

Turn simple text into flowcharts and diagrams, then export them as an image or PDF.

Data Zone

23 tools

Clean, combine, search and chart spreadsheets — remove personal info and spot duplicates.

Developer Toolbox

63 tools

Handy utilities for developers — formatters, converters, generators and quick references.

**Finance Desk**

32 tools

Calculators for loans, savings, investing and tax, plus private statement and budget tools.

Security Vault

10 tools

Encrypt files, check password strength, generate 2FA codes and inspect security tokens.

Password Desk

4 tools

Open and manage your KeePass password vault, create strong passwords and find weak ones.

Health Desk

7 tools

View and anonymize medical scans, read health-record files and track your lab results.

CHAPTER 1

Smart tools & sharing

SafePaper's standout features: ask an AI about your documents, chat privately, record your screen, and share files securely — all without anything leaving your device.

AI Desk

Ask your PDFs

Ask questions about your own PDFs and get answers that point you to the exact page. The AI runs right inside your browser, so your documents are never sent to anyone.

SafePaper Assistant

Private AI chat

A private AI chat that runs entirely on your own computer — no account and no sign-in. Once it has loaded, it even works without an internet connection.

Data Room

Secure sharing

Bundle PDFs, videos, images and spreadsheets into a single, password-protected file. Whoever you send it to simply opens it with the password — no app and no internet needed.

Record Desk

Screen recorder

Record your screen and webcam and get automatic captions and a written transcript. A private screen recorder that never uploads your video.

Share Desk

Direct transfer

Send a file straight from your device to someone else's, without it passing through any cloud storage on the way.

CHAPTER 2

Documents & paperwork

Everything you would normally send to an online PDF tool — plus scanning, email files, resumes, handwriting and ZIP archives.

Document Desk 33 tools

Everything you would send to an online PDF tool — create, merge, edit, sign and more.

CREATE

- Create PDF
- Markdown to PDF
- HTML to PDF
- Create form
- Images to PDF

ASSEMBLE & EDIT

- Merge
- Split
- Organize
- Insert
- Resize pages

ADJUST & COMPRESS

- Compress
- Crop PDFs
- Page numbers
- Header / footer
- Bates
- Bookmarks
- Deskew

SECURE & REDACT

- Protect
- Unlock
- Redact
- De-identify
- Clean

EXTRACT & CONVERT

- Text recognition (OCR)
- Export
- Extract images

INTERACT & ANNOTATE

- Sign
- Fill forms
- Watermark
- Links
- Annotate

ANALYZE & BATCH

- Compare
- Accessibility
- Batch

Scan Desk 9 tools

Scan documents with your camera — auto-crop, clean up and save as a searchable PDF.

- Camera scan
- Import photos
- Crop & straighten
- Deskew
- Scan filters
- Build PDF
- Searchable text
- Compress scan
- Hide sensitive info

Email Desk 4 tools

Open email files, save them as PDF, pull out attachments and check where a message came from.

- Email viewer
- Email to PDF
- Attachment extractor
- Sender check

Resume Desk 4 tools

Build a resume with live preview, check it against job keywords, and write cover letters.

- Resume builder
- Cover letter
- Keyword checker
- Import & export

Handwriting Desk 8 tools

Turn typed text into realistic handwriting — as pages, in your own hand, or as a video.

- Text to handwriting
- PDF to handwriting
- Notes to handwriting
- Write-on video
- Your handwriting
- Style lab
- Photo / scan look
- Signature maker

Archive Desk

2 tools

Peek inside ZIP files, pull out a single file, or build your own password-protected archive.

- Extract & browse
- Secure archiver

CHAPTER 3

Photos, video & creative

Edit photos, convert and trim video, clean up audio, apply smart image tools and draw diagrams.

Media Studio 18 tools

Convert, trim and compress video, make GIFs, build collages and clean photo location data.

- Convert video
- Trim & mute
- Change speed
- GIF maker
- Normalize audio
- Resize & convert
- Compress
- Crop & rotate
- Remove photo location
- Watermark
- Blur regions
- Avatar crop
- Collage
- Favicon pack
- Sprite sheet
- Color palette
- Optimize SVG
- Hide a message

Photo Desk 5 tools

A full photo editor with filters and one-tap enhance, plus iPhone (HEIC) and camera-RAW conversion.

- Photo editor
- Filters & effects
- Auto enhance
- HEIC to JPG
- RAW converter

Vision Studio 9 tools

Smart image tools — remove backgrounds, upscale, auto-blur faces and write image descriptions.

- Background remover
- Image upscaler
- Low-light fix
- Object detector
- Auto blur
- Caption & alt-text
- Auto tagger
- Depth map
- Batch pipeline

Audio Lab 10 tools

Trim, clean up, convert and automatically transcribe audio.

- Trim & fade
- Speed & pitch
- Normalize
- Remove noise
- Trim silence
- Remove vocals
- Spectrogram
- Loudness meter
- Transcribe
- Convert format

Diagram Desk 9 tools

Turn simple text into flowcharts and diagrams, then export them as an image or PDF.

- Flowchart
- Sequence diagram
- State diagram
- Class diagram
- ER diagram
- Mind map
- Gantt chart
- Graphviz (DOT)
- Playground

CHAPTER 4

Data, developer & finance

Work with spreadsheets and data, reach for dozens of developer utilities, and run finance calculators.

Data Zone 23 tools

Clean, combine, search and chart spreadsheets — remove personal info and spot duplicates.

UNDERSTAND & CONVERT

- Schema profile
- Format swap
- JSON flattener
- JSON to types
- GeoJSON to TopoJSON

CLEANSE & EXTRACT

- Personal-info scrubber
- HIPAA checklist
- Remove duplicates
- Pattern extractor
- PDF to CSV
- Transcript rows
- Log viewer

QUERY & COMBINE

- Run queries
- Join tables
- Append / union
- Filter rows
- Split export
- Row diff

GENERATE & CHART

- Sample data
- Dataset presets
- ID generator
- Series generator
- Quick charts

Developer Toolbox 63 tools

Handy utilities for developers — formatters, converters, generators and quick references.

CODE & FORMAT

- Format & minify
- Text diff
- Regex playground
- JSON toolkit
- YAML formatter
- XML formatter
- SQL formatter

CONVERT

- JSON / YAML / TOML
- cURL to code
- Timestamp
- Case converter
- Number base
- Color converter
- JSON to types

GENERATE

- Password generator
- ULID / NanoID
- Lorem Ipsum
- .gitignore
- LICENSE
- Dockerfile
- README badge
- Meta / OG tags
- robots.txt
- QR code

REFERENCE

- HTTP status codes
- HTTP headers
- MIME types
- Common ports
- ASCII table
- Regex cheatsheet
- SemVer rules
- Date tokens

ENCODE & TEXT

- Base64
- URL encode
- HTML entities
- Hex / ASCII / binary
- Unicode inspector
- String escape
- Base32 / Base64URL
- Gzip / Brotli

NETWORK

- URL parser
- CIDR calculator
- User-Agent parser
- IPv4 / IPv6
- MAC / OUI
- Query string
- Security headers
- HTTP client
- WebSocket tester

SYSTEM

- Cron explainer
- Chmod calculator
- Compose validator
- UUID generator

INSPECT

- HAR viewer + scrub
- SQLite browser
- Source map resolver
- Protobuf decoder
- PCAP viewer

SECRETS & CONFIG

- .env manager & diff
- Secret scanner
- K8s secret decode
- Config converter
- htpasswd generator

Finance Desk

32 tools

Calculators for loans, savings, investing and tax, plus private statement and budget tools.

CALCULATORS

- Loan & mortgage
- Compound interest
- Retirement / FIRE
- Investing simulator
- APR / APY
- Debt payoff
- Inflation
- Return & break-even
- Currency converter

BUDGET & STATEMENTS

- Import & analyze
- Budget builder
- Cash-flow forecast
- Net worth
- Subscriptions

INVESTING

- Rebalancing
- Growth rate
- Dividends
- Position sizing
- Live quotes

TAX & REFERENCE

- Income tax
- Capital gains
- Sales tax / VAT / GST
- Invoice / receipt
- Tax brackets
- Contribution limits
- Sales-tax rates
- Mileage rates
- Currency codes
- Live exchange rates

PRIVACY

- Statement redactor
- Encrypted export
- Finance data room

CHAPTER 5

Security, passwords & health

The most sensitive files of all — passwords, security tokens and medical records — handled entirely on your own device.

Security Vault 10 tools

Encrypt files, check password strength, generate 2FA codes and inspect security tokens.

- Token decoder
- Checksum / hash
- Password strength
- Encrypt a file
- Key pair generator
- Certificate decoder
- Key format convert
- 2FA code generator
- Password hasher
- Split a secret

Password Desk 4 tools

Open and manage your KeePass password vault, create strong passwords and find weak ones.

- Vault manager
- Password generator
- Vault health check
- Import & export

Health Desk 7 tools

View and anonymize medical scans, read health-record files and track your lab results.

- Scan viewer (DICOM)
- Scan anonymizer
- Scan to image
- Tag inspector
- Health message reader
- Health record viewer
- Lab result tracker

QUESTIONS

Common questions

Is it really free?

Yes — completely. There's no account, no subscription and no limits on how much you use it.

Do my files ever leave my device?

No. Your files stay on your computer or phone the whole time. Nothing is uploaded to us or anyone else.

Do I need to install anything?

No. It runs in your normal web browser — just open the website and start.

Does it work without internet?

Yes. After you open it once, most tools keep working even if you go offline. Some AI features download once, then work offline too.

Is there a file-size limit?

There's no fixed limit. How large a file you can work with simply depends on your own device's memory.

How is this different from other free online tools?

Most of them send your file to their servers to do the work. SafePaper does everything on your device instead, so your files never leave your hands.

Is my data used to train AI?

Never. Your files aren't sent anywhere, so there's nothing for us to collect or learn from.

GET STARTED

Open a file. Nothing leaves your **device.**

Try SafePaper in any web browser — no install, no account. Just open the site, drag a file in, and everything happens right there on your device.
